## Future-Ready Academic IT Solutions

---

DNSnetworks provides reliable IT (Information Technology) service management to advance the operation of your academic institutions. We strive to offer innovative IT solutions while ensuring the best experience for your faculty and students.

We offer remote and on-site support for cybersecurity, network infrastructure, cloud data storage systems, and day-to-day troubleshooting. We have a Critical Support Team available for after-hours requests. We include continuous monitoring for databases, servers, applications, and other critical infrastructure such as firewalls, switches, and wireless access points.

Our services are tailored to meet your immediate and future needs, aiming to optimize your digital setting and implement the best security protocols to ensure the safety of students and staff in online learning environments.

Thank you for considering DNSnetworks as your IT solutions management partner. We look forward to adding our expertise to your institution's technological strategies.

**Better  
infrastructure,  
better world.**

---

### **IT Support**

Our technicians are available by phone and email to remotely install and configure software applications and troubleshoot PC issues faculty & students might come across daily. We focus on resolving matters related to PC performance, peripherals such as webcams, microphones, printers, and displays, thereby enhancing the tech-based educational experience.

### **Device Procurement**

We manage the process of matching the best hardware and software to your institution's requirements - all within your budget. Connection to the latest technology boosts productivity across all spaces within your school, providing network devices, laptops, docking stations, and monitors for administration offices, libraries, and classrooms. Our technicians are also available for on-site visits to physically install equipment and fix hardware problems.

### **Cybersecurity**

Protection against cyber threats and data breaches is critical. Our team of experts detect, identify, and mitigate potential risks. With their management of firewalls and use of AI-driven threat analysis, we actively defend your institution from the escalating risk of cyber threats.

### **Secure Data and the Cloud**

Our hosted servers safeguard your encrypted data in your dedicated private cloud. We offer data back-ups and disaster recovery plans as preventative measures to maintain uptime even when worst-case scenarios occur.

### **IT Assessment and Consultation**

Our experts deliver assessments that align your institution with the utmost level of compliance regarding security procedures. Our consultations provide insights on network enhancements, device optimization, and cost consolidation for subscription-based products. Additionally, we detect and fill technology gaps and develop technical strategies that prevent IT issues, ultimately leading to minimized downtime and increased productivity.

**STRATUS51**

Smarter infrastructure  
through innovation.

---

## Security & Infrastructure

Build and maintain resilient IT & security solutions that are innovative and cost-effective.

## Secure Campuses, Brighter Futures

---

Stratus51 is a leading provider of comprehensive security solutions with a deep commitment to safety and a proven track record in the industry. We believe our services can significantly enhance the security infrastructure of your esteemed institution.

At Stratus51, we understand the unique challenges faced by educational institutions in maintaining a secure environment for students, staff, and visitors. Our tailored security solutions are designed to address these challenges effectively, providing a safe and conducive atmosphere for learning and growth.

We would welcome the opportunity to further discuss how Stratus51 can tailor our services to meet the specific security needs of your school.

Thank you for considering Stratus51 as your security partner. We look forward to the possibility of contributing to the safety and security of your location.

**Networks  
that are  
connected and safe.**

---

### Access Control

Implementing advanced access control systems to regulate entry and exit points, ensuring only authorized individuals have access to specific areas.

### Surveillance Systems

Installation of cutting-edge surveillance cameras and monitoring solutions to enhance overall campus security and deter potential threats.

### Structured Cabling

Connections through wires, cables and fiber optics that allow your employees and clients to communicate with each other.

### Audio Visual

Our flexible and elegant AV solutions use sound masking to deliver privacy and noise mitigation. We can help improve the productivity and overall experience of your workplace.

### Advanced Alarm Systems

Our State-of-the art alarm systems are designed to provide real-time alerts for any unauthorized access or security breaches. With a focus on early detection, we help minimize response times and mitigate potential risks.

### Remote Video Monitoring

Our systems enable remote monitoring, allowing authorized personnel to access live feeds and receive alerts from any location.

Unparalleled creativity  
to elevate and innovate.

# Creating Connected Academic Experiences

---

EspioLabs is a full-service design, development, digital marketing, and AI solutions studio. We are a team of talented full-stack developers, innovative creatives, meticulous marketing strategists, and forward-thinking visionaries equipped to handle diverse projects and cater to a wide range of clients.

As part of our commitment to enhancing the educational sector's digital footprint, we are keen on offering our refined services, specifically social media management and web development. We help institutions like yours in communicating its mission, learning opportunities, and the thriving community of students, staff, and alumni in an effective yet accessible manner.

## Social Media Management Services

- ✓ **Personalized Strategy Development**  
Crafting personalized strategies that cater to the specific needs of your institution while resonating with students, parents, and faculty alike.
- ✓ **Engaging Content Creation**  
Development of meaningful and contextually relevant content that highlights academic achievements, campus events, alumni stories, and other key aspects of your institution.
- ✓ **Community Management**  
Monitoring and managing your social media platforms to ensure prompt responses and facilitate constructive communication.
- ✓ **Performance Analysis**  
Tracking key performance metrics and adjusting strategies based on results to consistently improve your digital outreach.

Thank you for considering EspioLabs as your partner in digital transformation and innovation. We look forward to potentially shaping and positively impacting your institution's digital journey.

**Transcend  
the ordinary.**

---

## Web and App Services

- ✓ **Education-Centric Website Design**  
Designing user-centric, intuitive, and responsive websites that effectively communicate your institution's identity and values.
- ✓ **Student-Friendly Interfaces**  
Implementing easy-to-navigate layouts and functionalities that cater to the needs of your students, faculty, and potential applicants.
- ✓ **SEO Best Practices**  
Using search engine optimization techniques to improve your institution's visibility online and drive organic traffic to your website.
- ✓ **Secure and Robust Portals**  
Incorporating secure login and data protection features, enabling smooth access for students and staff members to important resources.
- ✓ **Ongoing Maintenance and Support**  
Offering dependable support, providing regular updates to keep your site relevant and secure.
